Noosa Specialist Orthodontist

Our philosophy

To provide a comprehensive orthodontic treatment plan that is aesthetically pleasing, functional, stable and most importantly - predictable.

Your treatment

We pride ourselves on our high level of service and personal attention to provide you with a superior orthodontic treatment.

INITIAL CONSULTATION

We are pleased to have you as a new patient. The initial appointment is to discuss your concerns and to determine your orthodontic needs. Parents or a guardian must attend with minors.

For your initial consult, we require two recent x-rays (an OPG and Lateral Cephalogram) to assist with your assessment and determine treatment. These should be done by a radiologist and if your dentist has not given you a referral, we will supply one for you. The cost of these x-rays is covered by Medicare.

At your consultation Dr Hardman will review the x-rays and radiographer's report, perform a short oral examination and discuss options. Your teeth will be scanned with our Itero Scanner which will provide 3D modelling to be used during the course of your treatment. A series of oral and facial photos will also be taken to be used in conjunction with your x-rays, reports and scans. All these components are vital tools in your assessment and provide us and you with a comprehensive record of your treatment.

your smile is our passion

ITERO ELEMENT SCANNER

The Itero Element scanner is the latest in cutting edge technology used to create high resolution 3D images and models of your teeth which will be used in your treatment planning. The Itero Element is engineered to capture 6,000 frames per second and is completely radiation free. With a scan capture time of 40 - 50 milliseconds, Itero Element is designed to capture 20 scans per second.

OUR TEAM

Dr Peter Hardman

Dr Hardman attended Sydney University for both his degree in dentistry and post-graduate degree in orthodontics. He has worked in group practices before settling into Noosa in 1998. Dr Hardman enjoys staying up to date with the latest improvements and technological advancements in orthodontics.

Vivienne Cunningham - Hygienist

Vivienne, a University of Queensland trained orthodontic auxiliary and hygienist, has over 25 years experience in her field. Dr Hardman and Vivienne work closely together to assist you with your pre and post orthodontic care and treatment. You will regularly see Vivienne throughout your treatment.

Dental Assistants

We have a dedicated team of dental assistants and administrative staff. Together, they contribute a wealth of knowledge and experience to the practice.
